# Product Comparison

Capabilities	 MyDNFB.com	Manual Process
<b>General</b>		
Turn data into dynamic information		
ALL unbilled accounts in one comprehensive repository, including inhouse and discharged patients		
Multi-departmental collaboration in one management system		
No need for IT involvement to develop reports		
Eliminate the need to manually manipulate data		
Reduction in cost per case to investigate, work and close		
Crosswalk of bill hold codes to departments for automatic assignments and follow-up		
<b>Sorting, Filtering &amp; Viewing</b>		
Instant identification of high dollar accounts, accounts over the bill hold, etc.		
Simple filtering of accounts based on any account attribute		
Multiple views of the DNFB by department, patient type, bill hold, aging, payor, discharge/visit date, etc.		
Quick sorting of accounts by any field in the unbilled data		
<b>Monitoring, Tracking &amp; Alerting</b>		
Monitor and track each account from the date it appears on the Unbilled report to the date it is billed		
Automated alerts when accounts are aging before and beyond bill hold days, etc.		
Automated alerts to users who are responsible for working the accounts (Including e-mail and text messages)		
<b>Notes/Journal</b>		
Add and save notes to any account for a complete story of the account history, investigation and progress until the case is billed and removed from the Unbilled Report		
View cumulative notes in a journal format for each account		
Notes are auto stamped with user ID, date and time		
No rewriting of notes each and every day		
<b>Assigning Accounts</b>		
Immediate assignment of accounts to users and contacts		
Tracking and alerts of each assignment for completion		
Assign one or a bulk of accounts with ease		
Auto assignment of accounts to departments based on bill hold codes		
<b>Reporting</b>		
Unlimited summary reports displaying the unbilled data grouped by any field in the data set		
Detailed account listings filtered, grouped, sorted and displayed the way you want		
Trending reports to identify areas in need of process improvement and root cause assessment		
Color graphs and charts accompanying most reports
